RINKU NAG

UI Developer | 888-4708-014 | rinkunag629@gmail.com

Professional Summary

Experienced and results-driven Lead UI Developer with over 10 years of expertise in building scalable, user-friendly, and visually engaging web applications. Passionate about creating intuitive user interfaces, optimizing front-end performance, and collaborating with cross-functional teams to deliver exceptional digital experiences. Proficient in modern front-end technologies, design principles, and agile methodologies.

SKILLS

- **Languages & Core Technologies:** HTML, CSS, JavaScript, Angular, Unit Testing, k6 DevTools
- **Tools & Software:** Jira, Bitbucket, TeamCity, Confluence, Octopus, VS Code, Git Extension/SourceTree, XD, Figma
- **Methodologies & Expertise:** Front-End Technologies, Agile Methodologies, API Integration, Code Quality & Performance, Build & Deployment, Version Control

---

PROFESSIONAL EXPERIENCE

Saksoft | Module Lead | December 2019 – Present

- Lead a team of developers in delivering high-quality front-end solutions, driving consistent growth in project efficiency and code quality.
- Collaborate closely with product managers, back-end engineers, and QA teams to deliver solutions aligned with project requirements and user needs.
- Partner cooperatively with client services, sales, and design teams in a deadline-driven environment.
- Follow SDLC best practices within an Agile environment to produce rapid iterations for clients.
- Recommend new technology integration based on suitability and alignment with business goals.
- Create and publish custom NPM packages.
- Collaborate with cross-functional teams to align design and development efforts, resulting in improved UI/UX outcomes.
- Facilitate Scrum events ranging from Sprint Planning to running Retrospectives alongside the team.

- Contribute to multiple projects and participate in load testing initiatives for websites to ensure optimal performance under heavy traffic loads.
- Execute end-to-end migrations for Angular, DevExtreme, and other dependent packages.
- Design and develop Full HD, QHD, and 4K resolution design-compatible screens.
- Drive performance optimization and actively participate in code reviews and deployments.
- Manage team dashboards and Jira projects.
- Resolve deployment issues and collaborate closely with DevOps teams across multiple projects.
- Address project technical challenges and provide effective solutions.
- Suggest and implement better alternatives to clients based on their specific requirements.
- Research emerging web technologies and trends for potential site integration.
- Collaborate with UX designers to translate wireframes and prototypes into interactive, pixel-perfect user interfaces while ensuring consistent design patterns and a seamless user experience.
- Boost conversion rates through meticulous attention to UI/UX design principles and data-driven testing strategies.
- Design and update layouts to meet usability and performance requirements.
- Improve tools to boost user interaction and deliver design versatility.
- Contribute to projects within Scrum project management environments.
- Prepare and deliver client proposals, collaborating with stakeholders to address client needs and business objectives while ensuring alignment with project goals and budget requirements.

Infosys | Technical Analyst | 2018 – 2019

- Developed dynamic and responsive user interfaces using HTML and CSS, achieving optimal compatibility across various devices and browsers.
- Leveraged AngularJS to build interactive and performant front-end applications, enhancing user engagement.
- Contributed to the design and architecture of front-end systems, optimizing the codebase for maintainability and scalability.
- Collaborated closely with designers and backend engineers to ensure cohesive implementation of UI designs.
- Integrated Power BI with Angular to enable viewing of Power BI reports within the application.
- Addressed code optimization and resolved memory leakage issues.
- Implemented asynchronous calls to enhance application performance and developed download functionality for grids.
- Engineered grids, forms, layouts, Kendo multi-select/single-select dropdowns, breadcrumbs, routing, polling, shared services, pagination, and aggregate functions.
- Implemented state management solutions (e.g., Redux, Context API) to manage complex application states and ensure optimal performance.
- Developed reusable and modular UI components using Angular, ensuring scalability and maintainability.

Genpact | UI Developer | 2015 – 2018

- Collaborated with the production team to implement UI enhancements and optimize the user experience.
- Developed UIs with a Model-View-Controller (MVC) approach using Ext JS 6, updating pages based on client feedback.
- Utilized Ext JS 6 to develop grids, tree-grids, forms, layouts, and charts.
- Implemented auto-refresh functionality for grid data.
- Performed complete application lifecycle functions from conception to final release, including design, analysis, implementation, testing, deployment, and maintenance.
- Designed web pages and applications aligned with business and user goals to provide a positive user experience.
- Debugged and resolved software defects.
- Utilized Git and ClearCase for version control, WebLogic for application deployment, and Jira for bug tracking.

EDUCATION

- **Bachelor of Engineering in Computer Science & Engineering** | RTMNU | 2014
- **Higher Secondary Certificate (HSC)** | Nagpur University | 2010
